PROFESSIONAL SUMMARY

Backend-focused Software Engineer with hands-on experience supporting C#/.NET and SQL Server ERP applications. Independently built a migration utility that processed 130K+ vouchers across 13 branches and a head office during the company's first GCC onboarding. Built and tested a multi-tenant ASP.NET Core and React recruitment platform with tenant isolation, secure authentication, caching, messaging, and automated CI checks.

TECHNICAL SKILLS

- **Backend:** C#, .NET, ASP.NET Core Web API, .NET Framework, Entity Framework Core, Entity Framework, REST APIs, LINQ
- **Data & Messaging:** SQL Server, T-SQL, Redis, RabbitMQ, Azure Blob Storage
- **Frontend & Desktop:** React, TypeScript, HTML, CSS, WPF, WCF
- **Testing & Delivery:** xUnit, Testcontainers, Vitest, React Testing Library, Playwright, Git, Docker, GitHub Actions, CI/CD

PROFESSIONAL EXPERIENCE

Junior Software Developer | Logiology Solutions **| Oct 2025 - Aug 2026**

- Independently developed a C#/.NET and SQL Server migration application that processed 130K+ vouchers across 13 branches and a head office during the company's first GCC customer onboarding, preserving historical transaction data.
- Mapped undocumented source data across 17+ ERP modules and implemented validation, failure logging, selective retries, and reconciliation against business reports to improve migration reliability.
- Replaced eager startup loading across 14 master-data paths with identifier-based, on-demand SQL retrieval, eliminating unnecessary database queries during application startup.
- Diagnosed production stock-validation and calculation defects by tracing business rules and SQL data; delivered application fixes and live database corrections for ERP users.
- Developed and supported sales, inventory, accounting, reporting, and import/export workflows in C#/.NET and SQL Server for ERP products used by 500+ clients

Recognition: Received the company-wide **Best Developer of the Month** award in May 2026.

AI/ML Trainee | HeveaHill Technologies **| Aug 2025 - Sep 2025**

- Integrated Hugging Face language models with Retell AI voice agents for healthcare appointment booking and validated responses across representative call scenarios.

SELECTED PROJECT

Pursuit - Multi-Tenant Recruitment Platform | GitHub

Technology: ASP.NET Core, C#, EF Core, React, TypeScript, SQL Server, Redis, RabbitMQ, Docker

- Developed REST APIs and React workflows for employer job posting, public job search, candidate resume submission, and administrative user management.
- Enforced tenant isolation through EF Core query filters and ownership checks, with integration tests covering cross-tenant access boundaries against containerized SQL Server.
- Implemented refresh-token rotation and reuse detection, Redis cache-aside with SQL fallback, and resilient Redis/RabbitMQ startup behavior.
- Automated verification with 51 backend tests, 47 React component tests, and Playwright journeys across Chromium, Firefox, and WebKit in GitHub Actions.

EDUCATION

Bachelor of Technology in Information Technology | College of Engineering Thalassery **| 2021 - 2025**
APJ Abdul Kalam Technological University
